

The Newcomen Society

for the history of engineering and technology

Welcome!

This Index to volumes 66 to 70 of [Transactions of the Newcomen Society](#) is freely available as a PDF file for you to print out, if you wish.

If you have found this page through the search engines, and are looking for more information on a topic, please visit our **online archive** (<http://www.newcomen.com/archive.htm>). You can perform the same search there, browse through our research papers, and then download full copies if you wish.

By scrolling down this document, you will get an idea of the subjects covered in Transactions (volumes dating from 1995 to 1999 only), and on which pages specific information is to be found.

The most recent volumes can be ordered (in paperback form) from the [Newcomen Society Office](#).

If you would like to find out more about the Newcomen Society, please visit our main website: <http://www.newcomen.com>.

General Index
Transactions, Volumes 66-70
1995-1999

Abbreviations

agric.	agriculture
archit.	architect
bldr.	builder
c.	<i>circa</i>
cent.	century
civ. engr.	civil engineer
contr	contractor
elec. engr.	electrical engineer
enr.	engineer
ff.	following
i.c.	internal combustion
loco.	locomotive
mech. engr.	mechanical engineer
merchts.	merchants
mfrs.	manufacturers
pm.	<i>passim</i>
rly.	Railway

A.C. distribution, high-voltage, France (1890s), **70**, 191

AB Motorer, Stockholm, **67**, 60

ABB-Daimler Benz, **67**, 11,19

Abbeydale scythe works, **68**, 2

ABB-Henschel, **67**, 11, 19

Académie des Sciences, Paris, **69**, 100,113

Ackermann, Rudolph, patent carriage steering, **70**, 2, 21

Acoustics, for aircraft detection, **69**, 4, 5

Admiralty Engineering Laboratory, **67**, 70

Admiralty Research Laboratory, Teddington, **69**, 1, 5; Development Establishment at Vickers Armstrong, Barrow-in-Furness, **69**, 87

Admiralty, **67**, 53, 54, 63, **70**, 164,166; Board of Invention and Research, **67**, 164

Advanced Passenger Train, gas turbine powered, **70**, 48-9

AEG, **68**, 271, links with Edison, **70**, 190

Aeolipyle, 70, 89, 127

Aeronautical Research Council, 68, 65

Agas, Ralph, 70, 110

Agriculture, mediaeval monastic, 68, 6-10

Ahlund, August, 69, 271, 272

Air Defence Experimental Establishment, Biggin Hill, 69, 1

Air defence, 67, 161-183; acoustic devices, 67, 166-168, 182; anti-aircraft gunnery, technical aids for, 67, 179; infrared radiation, use of, 67, 169

Air Ministry Research Establishment, Orfordness, 69, 1, 15, 16

Air pump, food preservation experiments, 70, 125

Aircraft engines, 68, 57, 60-68 *pm*; Armstrong-Siddeley 'Tiger', 68, 61; Rolls Royce 'Eagle', 68, 54; Sunbeam 'Cossack', 68, 54; Cierget, 69, 147; Gnome, 69, 147; Le Rhone, 69, 147, 158; Rolls Royce, turbo rocket, 69, 9; Salmson, 69, 147-165; Sunbeam, 69, 158

Aircraft, launchers, 'Electropult', 67, 189, 190

Alphand, Jean-Charles Adolphe, 69, 116

Alternators, turbine, 68, 202

Aluminium Corporation Ltd, Dolgarrog, 69, 212-4, 219, 222, 223

American Locomotive Co., 70, 47

Ames, Jeremiah, 67, 146

Ampère, Andre Marie, 68, 30

'And now the weather': the early history of the meteorological satellite, Mo Williamson, 66, 53-75

Anderson, Jo, 69, 5

Anderson, Professor, 68, 85

Andrew, J. H. et al, *The Transition from Timber to Cast Iron Working Beams for Steam Engines*, 70, 197-220

Andrew, J. H., *The costs of eighteenth century steam engines*, 66, 77-95

Animal breeding, mediaeval, 68, 7

Appert, Nicolas, 70, 128, 130

Aqueducts, near Paris, 69, 109; New River, London, 70, 111-12; Richard Cail contractor, 70, 171; Rigole de Courpalet, 70, 114; Rigole de St. Prive, 70, 114

Architecture, mediaeval monastic, 68, 17-22; Gothic, principles of, 68, 19-22; Gothic and Romanesque compared, 68, 19

Armengaud, 70, 27, 29

Armstrong-Whitworth, 68, 61

Army/navy communications, Shusui development, , **70**, 266

Arnold, -, 68, 201

Atchison, Topeka & Santa Fe RR, gas turbine locos., **70**, 43

Ateliers et Forges de la Loire, 70, 36

Atkindon, William, archt., **69**, 237

Atkinson, G., Eugene Belgrand (1810-1878): civil engineer geologist and pioneer hydrologist, 69, 97-127

Automation, in circuit design & constr., **68**, 180; computer design, **68**, 183

Axles, Collinge, **70**, 2

Ayres, Thomas, 66, 4, 6, 7, 10

Baber, William, **67**, 134

Bacon, Francis, **70**, 125

Bacon, Roger, 67, 128

Bagshawe, George Fox, **66**, 234

Bailey, M. R., Learning through replication: the 'Planet' locomotive project (Presidential address), 68, 109-136

Bailey, V.A., 69, 7, 9

Baird, John Logie, **68**, 166

Bakelite, housing for radio components, **68**, 33

Baldwin Locomotive Works, 70, 43

Barclay, Curie & Co., 67, 55, 56

Barney, Thomas, **69**, 284; Newcomen engine print **69**, 284ff.

Barrett, Stanley George, **68**, 147

Barwell, Prof. Fred, **67**, 192

Batchelor, Charles, **70**, 189

Bateman & Sherratt, 67, 222

Bateman, John Frederic, **68**, 150, 152, 155ff.

Batteries, electric, dry, **68**, 30ff.; for radios, **68**, 169; storage, for elct. rlys., **68**, 197, 199, 203, 205; carbon-arc lighthouse lighting, **70**, 156, 157

Bauch, Martin Alexander, **70**, 131

Baugh, Isaac, **67**, 146

Bawdsey Research Station, 69, 1, 10, 15, 17, 20

Bazalgette, Sir Joseph William, canal work, **69**, 43; compared with Belgrand, **69**, 98

Beale's, Deptford, **70**, 23

Beams, cast iron: adoption pressures, **70**, 202-4; advantages, **70**, 211; blowing engines, **70**, 202; Boulton Watt & Co., **70**, 197-219; costing, **70**, 210-11; design (Letter to Mr Lee), **70**, 213-16; development, **70**, 204-8; diffusion, **70**, 208-9; elliptical, **70**, 197-8, 205-6; engines manufactured, **70**, 217-18; optimization, **70**, 209-10; rimmed, **70**, 206-8; Soho foundry production, **70**, 210

Beams, wooden: double acting engines, **70**, 198- 200, 200, 201, 202; king post, **70**, 199; queen post, **70**, 200; single log, **70**, 198-9; structural problems, **70**, 200, 202

Beams, wrought-iron, **70**, 212

Beardmore, William, **69**, 213

Bearings, for marine diesel engines, **66**, 38

Becker, Karl, **67**, 110

Becklake, E. J., The V2 rocket: a convergence of technologies? , **67**, 109-123

Beecham, Sir Joseph, **69**, 209

Beeching, Dr, effect on railways, **67**, 192

Beer making, mediaeval, **68**, 16

Behrens, -, **68**, 30

Beighton, Henry, **66**, 10, 11

Belgrand, Eugene, **69**, 97-127; list of published works, **69**, 122-7

Bell Systems Laboratories, **68**, 166, 179

Boulton Watt & Co.: cast iron beams, **70**, 197-219; engines manufactured, **70**, 217-18

Boulton, M. (Mint) Co., **67**, 27

Boulton, Matthew Robinson, **67**, 32

Boulton, Matthew *see* Engines, steam, Boulton & Watt

Boulton, Matthew, **68**, 91, 92, 96, 98; **70**, 90-104

Boulton, Watt & Son, **67**, 43

Bowman, D., *The Rainton to Seaham Railway 1820-1840*, **69**, 249-269

Boyle, Robert, food preservation experiments, **70**, 124-30

Bradley, Richard, **66**, 2

Brady, James Buchanan, **66**, 227 *et seq.*

Bramah, Joseph, **66**, 166, 167, 170; **70**, 104

Bramah, steam carriage, **70**, 4; Didsbury, **70**, 6

Bramah, Timothy, **69**, 238, 239; **70**, 7

Branca, Giovanni de, 70, 89
Brandling, R. W., 70, 136
Branly, Edouard Eugene, 67, 209, 211, 213
Brasside (Belmont) viaduct, 70, 168
Braun, Wernher von, 67, 109-123 *pm*; 69, 72, 87
Brickmaking, Richard Cail, 70, 178
Bridges, Blackfriars, 66, 182; London, 66, 246; McIntosh-contracted, 66, 181; Vauxhall, 66, 247
Bridges, iron, Dee Chester, 69, 132; Grosvenor, Chester, 69, 129-145; Lea, London, 69, 28; Vauxhall, London, 69, 28
Bridges, masonry, Bow, 69, 29; Victoria, Glasgow, 69, 44; Westminster, repair of, 69, 29
Bridges, Richard Cail, 70, 172, 174; *see also* viaducts
Briot, -, 67, 108
British Association for the Advancement of Science, 67, 207, 211
British India Steam Navigation Co., 67, 56
British Iron and Steel Research Association (BISRA), 66, 215
British Railways, 67, 5, 6
Britton, Sydney Ernest, 69, 216, 217, 219
Brodie, William, 69, 68
Brown Boveri, 66, 37, 3-phase systems for rail traction, 67, 1ff.
Brown Boveri: *see* locomotives, gas turbine
Brown, C. E. L., 67, 1
Brown, Harry Farnsworth, 67, 23
Brown, John, & Co., 67, 63
Brown, R. Hanbury, 69, 17
Browney viaduct, 70, 182
Bruckner & Kanis, 69, 74
Brunel, Isambard Kingdom, 66, 185, 252; 69, 135-6, 144
Brunel, Marc Isambard, 66, 159, 164
Brunel, Sir Marc Isambard, 69, 129, 132, 133, 134, 135, 136,
Brunswick Wharf, 66, 248
Brydges, James, Duke of Chandos, 66, 9, 11

Buchanan, B. J., *The technology of gunpowder making in the eighteenth century: evidence from the Bristol region*, **67**, 125-1 59; *Waltham Abbey Royal Gunpowder Mills: 'the Old Establishment'*, **70**, 221-50

Buddle, John, 69,249-262 *pm*

Budgen, Richard, **67**, 136

Bull, Edward, **67**, 33

Bull, patent trial against Watt, **70**, 104

Bulleid, O. V. S., **68**, 235, 242

Bullivant, Arthur, **66**, 97

Burgess, Alfred, **69**, 39, 41, 42, 45

Burlington, Northern RR, **67**, 17

Burmeister & Wain, **67**, 55 *et seq.*

Burns, R. W., *Technology and air defence, 1914 to 1945*, **67**, 161-183; *The development of methods of detecting hostile aircraft at night, 1935-1941*, **69**, 1-21

Burstall, **70**, 7 , 18

Butement, W. A. S., **67**, 175

Butterley Iron Co., **69**, 28

Byker Bridge, **70**, 174

Cail, Richard: addressees, **70**, 183; building contractor, **70**, 163-5; civic positions, **70**, 175-8; coke oven building, **70**, 162-3; dock building/repair, **70**, 164-5; drawings, **70**, 182; early life, **70**, 161-2; house building, **70**, 162, 165; Newcastle. churches, **70**, 163; Newcastle public baths, **70**, 163; patents, **70**, 182; publications, **70**, 182; railway contractor, **70**, 165-70; retirement from contracting, **70**, 172-5; water supply, **70**, 1702, 178

Cairn Line, **67**, 73

Cairns, C. W., **67**, 73

Calder, Nigel, **66**, 58, 69

Calley, John, **69**, 283

Camera Obscura, use in surveying, **70**, 121-2

Circuits, integrated, **68**,167,179; printed, **68**,181

Civil engineering contractor: *see* Cail, Richard

Clanny, William Reid, miners' safety lamp, **70**, 135-41

Clark, E. F. (Past President), 67,157-8; *The evils of break of gauge*, **66**, 241- 264

Clark, E. Kitson, **66**, v

Clark, Latimer, **66**, 99

Clark, William Tierney, **69**, 242, 132

Clarke, -, alkali maker, **68**, 225

Clarke, Dugald, **67**, 225

Clerk, Sir John, **66**, 13

Clow, D. *Pneumatic tube communication systems in London*, **66**, 97-119

Coaches, mail, Besant, **66**, 197-8; Chabannes, **66**, 198ff,

Coal mining, Durham, **69**, 249ff.; Hetton Colliery, **69**, 250

Coal, fuel for steamships, **67**, 73

Coalbrookdale, cast iron ware for gunpowder mills, **67**, 146, 148, 149; steam engine castings, **70**, 94, 95

Cockerell, Sir Christopher, **67**, 194, 195

Cofferdams, for Westminster Bridge piers, **69**, 29

Coherers, **67**, 209, 211

Coin making, **67**, 91-108 *pm*, cold striking, **67**, 93; crank pressing, **67**, 105; drop pressing, **67**, 103; rolling, **67**, 99; screw pressing, **67**, 96

Coin making, dies, **67**, 91-108; ancient, **67**, 91-94; bronze, **67**, 91-92; engraving, **67**, 93-94; iron, **67**, 93ff.; mediaeval, **67**, 94ff.; steel, **67**, 103; wrought iron, **67**, 94

Coke oven building, Richard Cail, **70**, 162-3

Colt Crag, **70**, 171-2

Columella, food preservation, **70**, 125

Combustion, coal burning gas turbine loco., **66**, 129-30

Comelli, -, clockmaker, **67**, 102, 103

Commercial Dock Co., **69**, 28

Committee for the Scientific Study of Air Defence, **69**, 1, 2, 9, 15

Components, electrical, passive, **68**, 29ff. table 1745-1900, **68**, 31

Components, electronic, passive, **68**, 32ff.; government influence on, **68**, 40-1; high altitude, **68**, 39; humidity effects on, **68**, 38; miniature, **68**, 42; reliability, **68**, 35, 47; standardisation, **68**, 164; storage effects on, **68**, 37; temperature effects on, **68**, 37

Compressors, gas turbine loco., **66**, 125

Computers, construction, **68**, 167ff., 175; digital, early, **68**, 167; digital (thermionic valves), **68**, 175; digital (transistors), **68**, 179; EM interference in, **68**, 177; plug-in packages, **68**, 178

Comyns-Carr, C, A. contrib. to P. R. Stokes paper, **69**, 95; *The application of the Doble steam power concept to coal-fuelled rail traction*, **69**, 177-203

Condenser, separate, **68**, 85-107 *pm*; origin, **68**, 90

Condensers, steam, Doble system, **69**, 178

Conductivity, thermal, and steam engines, **68**, 88

Congreve, Sir William, **67**, 110

Congreve, William, **70**, 243

Connections, electrical, **68**, 157

Contractors (1832-1862), Newcastle, **70**, 178-9; list of, on public works to 1850, **66**, 176

Converters, electromechanical, **68**, 201-8; Motor, **68**, 206; rotary, **68**, 202ff.

Conveyors, pneumatic, **66**, 97 -119

Cooke, W. P. M., **69**, 88

Cooke, William Fothergill, **68**, 30

Cooper, D R., *The development of coinage dies from bronze to steel*, **67**, 91-108

Cooper, James, **69**, 26, 29, 30, 32, 39, 41, 45

Copper mining, Cornish, steam power in, **67**, 27-51

Corbridge tunnel enlargement, **70**, 165-6

Cornish Metal Co., 67, 39

Corporation of the Trinity House, **69**, 38-9, 41

Corps des ponts et chaussées, **69**, 98, 104

Cost of eighteenth century steam engines, *The*, I. H. Andrew, **66**, 77-95

Coulthard & Co., Gateshead, **68**, 142

Cowell, N. D., *The Contributions of Robert Royle and Denis Papin to Food Preservation*, **70**, 123-33

CPVA, Kiel-Dietrichsdorf, **69**, 71

Craig, John, **68**, 85, 90

Crawshay, William, Gurney steam carriage, **70**, 11

Creighton, William, **67**, 29

Crompton Parkinson, motors, **66**, 109

Crowdy, E. P., **66**, 41

Crown purchase, Waltham Abbey, **70**, 222, 232, 243

Cubitt, William, **66**, 165

Cueppers, Heinz, **67**, 94

Culture stereotypes, **70**, 187

Cunaeus, A., **68**, 29

Cycle cars *see* Motor cars, light

Dalen, G., 70, 27, 56

Dams, for N. Wales hydro-electric schemes, 69, 206-230 *pm*; mediaeval, 68, 8, 14; Varluisant, France, 68, 8

Dance, Sir Charles, 70, 12, 13

Darby, Abraham, I, 67, 146

Darwin, Erasmus, 70, 91

Darwin, Francis, 67, 208

Dasgupta, S., *Forgotten history: Sir Jagadis Rose and the origins of radio*, 67, 207, 219

Davenport Boiler Corp., 70, 41

Davidson's Quay, 70, 164

Davy, Edward, 68, 30

Davy, Sir Humphry, miners' safety lamp, 70, 135-141 *pm*

De Havilland Aircraft Co., 69, 88, 89

De La Hire, 70, 117

De Luc, J. A., 68, 30

De Pambour, Chev. F. M. G., 68, 121, 123

Deerness viaduct, 70, 182

Desaguliers, John Theophilus, 66, 9, 11ff; 68, 88

Desch, C. H., 66, VI

Desormes, -, 68, 30

Dewar, James, 67, 208

Dickinson Memorial Lecture, 22nd, *The development of the linear induction motor*; E. R. Laithwaite, 67, 185-205; 23rd, *Diversity and diffusion: the transfer of technologies in industrial Europe*, R. Fox, 70, 185-195

Dickinson Memorial Medal, 70, 196

Dickinson, H. W., 66, v; 67, 27, 29, 33, 46; (historian), 70, 193-4

Dies, coin making *see* Coin making, dies

Diesel engines, marine, Doxford, 66, 27ff.; Fullager, 66, 39; North British, 66, 31

Digges, Thomas, and telescope, 70, 113-117

Digby, Sir Kenelme, 70, 124

Disappearance of horizontal Irish watermills, T. F. Powell, 66, 219-224

Dittmann, F., *The Dresden Haidebahn and the early development of trolleybuses*, 68, 267-280

Doble Steam Motors Corporation, 69, 177

Doble, Abner, **69**, 177,180,181; steam power system, **69**, 177-203

Doble, Warren, **69**, 181,2-2

Dock building/repair, Richard Cail, **70**,164-5,176

Dock gates, **69**, 62-3, 68; cast iron, **69**, 63; timber, **69**, 63, 68

Docks, Commercial. London, Walker's work for, **69**, 28; Liverpool, **69**, 58-67; Alfred Entrance, **69**, 63, 64; Canada Entrance gate failure, **69**, 62; dry docks, **69**, 67; gates, **69**, 62-3; Gladstone Graving Dock, **69**, 67; King George V Dock, **69**,67; Princess Dock, **69**, 67; retaining walls, **69**, 60-2; London, **66**, 178ff., 246, 250; McIntosh-contracted, **66**, 181; Plymouth, **66**, 180; Portsmouth, **66**, 153

Donkin, Bryan, **69**, 238, 239, 241

Dornberger, Walter, **67**, 110, 112, 116, 121

Double stack edge runners, **70**, 241, 242

Douglas, James, civ. engr., **69**, 40-1

Douhet, General, **67**, 161

Dowding, Air Marshal Sir Hugh, **69**, 1, 20

Dowding, Lord, **67**, 174

Doxford engine, its development and decline, The, D. Griffiths, **66**, 27-51

Doxford Hawthorn Research Services Ltd, **66**, 41

Doxford, engines, **67**, 55ff.

Doxford, William, shipbuilders, **66**, 27-51

Drainage, Fenland, **69**, 41

Drais von Sauerbronn, Karl Freiherr, **68**, 267

Dredging, Liverpool Docks, **69**, 63-4

Droz, -,67, 103,105

Du Moncel, Theodore, **70**, 189-90

Dudbridge Iron Works, Stroud, **69**, 147, 149ff.

Dudley and Ward, Edward, Lord, **69**, 284

Dudley, Thomas, **67**, 28

Duffy, M. C., *Power supply to DC electric railways, 1890-1920*, **68**, 191-217; *Solid state electronics, asynchronous motors and the electric locomotive*, **67**, 1-26 ; *The gas turbine in railway practice*, **70**, 27-58

Dumb mills, **70**, 230, 247n26

Dummer, G. W. A., *A history of electronic passive devices*, **68**, 29-51

Durand-Claye, Alfred, **69**,112

Durham viaduct, 70, 182

Dynamo-powered, carbon-arc lighthouse lighting, 70, 157-8

Early research in linear induction motors for manufacturing machinery, W. Johnson, 66, 215-218

East India Company, 67, 137

Easton, Amos & Co., 66, 100, 101

Ecole des ponts et chaussées, 69, 98

Ecole polytechnique, 69, 100

Edge runners, 70, 225- 7, 247n20; Poccetti fresco, 70, 223; Smeaton's mills Waltham Abbey, 70, 240, 241, 242

Edgeworth, Richard Lovell, 70, 91

Edison, Thomas Alva: European financial backing, 70, 1901; image creation, 70, 188-90

Ejectors, steam, 66, 101

Elder Brethren: see Trinity House

Electric motors, asynchronous, 67, 1ff.; linear, 67, 185-205; 'Electropult', 67,189,190; Gorton project, 67, 192-3; origins, 67,186-7; transport applications, 67, 196- 204 *pm.*,. transverse flux, 67,197

Electric Telegraph Co., 66, 97, 98, 99

Electric traction, French (SNCF), 67, 14 *see also* Locomotives, electric

Electricity (Supply) Act 1919, 69, 218
